PROFESSIONAL SUMMARY

Data analytics professional with over 10 years of experience in advanced analytics, data visualization, and sales operations support, expert in SQL, Python, and Tableau. Key achievements include a 6% reduction in booking relocations through rigorous quantitative analysis, a 25% reduction in report delivery time via pipeline automation, and building AI-powered triage intelligence systems using agentic AI. Seeking an Advanced Analytics & Reporting role where technical expertise in quota modeling, performance analytics, and AI/ML-driven automation can drive scalable, data-driven decision-making.

PROFESSIONAL EXPERIENCE

Expedia Group, Gurgaon, India

Senior Analyst | July 2017 - Present

- Product strategy and metric improvement: Engineered a multi-source data model to identify 20K high-risk properties, developing a prioritized recovery roadmap that lowered the Relocation Ratio by 6% and improved platform reliability.
- Performance and quota analytics: Architected high-impact Executive Scorecards in Tableau for leadership, providing real-time visibility into North Star KPIs including attainment ratios, coverage models, and revenue targets - reducing manual reporting cycles by 40%.
- Pipeline automation and efficiency: Engineered automated data pipelines using Python and SQL to monitor operational costs and sales performance, achieving a 25% reduction in report delivery time and empowering leadership to reduce expenses.
- AI-powered analytics (Project Gestalt): Designed and built an end-to-end AI automation system using agentic AI (Claude API) that fetches live Jira data, applies intelligent triage logic, and generates interactive HTML dashboards, CSV exports, and presentation-ready reports - eliminating hours of manual analysis per reporting cycle.
- Workflow automation (n8n): Built automated weekly reporting workflows using n8n to schedule data extraction, transformation, and distribution of performance reports to stakeholders - reducing manual effort and ensuring consistent, timely delivery of insights.
- Analytical problem solving: Acted as the primary bridge between Product, Operations, and Data Science teams; translated complex business problems into analytical problem statements and delivered SQL-based deep dives to resolve urgent business issues.
- Cross-functional leadership: Collaborated with product, engineering, and sales operations teams on territory segmentation, performance tracking, and analytics project delivery - accelerating timelines by 2 weeks through agile intake processes.
- Insight generation and forecasting: Delivered weekly insight reports incorporating performance metrics, trend analysis, and forecasting to senior leadership, guiding strategic planning and resource allocation decisions.
- System integration: Led the end-to-end design of dashboards integrating Jira and SQL pipelines to reduce backlog ambiguity and improve visibility for product leadership.
- Program governance and team development: Developed Coaching Dashboards for operations teams to monitor agent KPIs; championed a centralized Knowledge Base in Confluence that reduced team onboarding time by 30%.

IQVIA, Gurgaon, India

Technical Analyst | 2015 - 2017

- User Satisfaction: Led the implementation of client-driven features, resulting in a 15% improvement in client satisfaction, demonstrating a focus on user needs and product value.
- Process Optimization: Enhanced team productivity by 30% by optimizing complex SQL queries and streamlining analysis processes.
- Knowledge Sharing: Championed the implementation of Confluence to improve knowledge sharing and team collaboration, fostering a culture of documentation and scalability.
- Stakeholder Management: Facilitated stakeholder meetings to promote cross-functional collaboration and ensure alignment on project goals.

TECHNICAL SKILLS

Programming & Data: Python (pandas, NumPy, automation, data modeling), Advanced SQL, HiveQL

Data Platforms: Snowflake, Databricks, AWS, BigData, Data Warehousing

BI & Visualization: Tableau (Expert), Power BI, Microsoft Excel, Executive Dashboarding

AI/ML & Automation: Machine Learning, Predictive Analytics, Agentic AI, Pipeline Automation, Anomaly Detection

Sales Operations: Quota Planning & Attainment Analysis, Commission & Incentive Modeling, Territory Planning, Forecasting, Capacity Models

Leadership: Team Leadership & Mentoring, Stakeholder Management, Agile Project Management, Cross-Functional Collaboration, Storytelling

KEY ACHIEVEMENTS

- 6% reduction in booking relocation ratio through data-driven performance analytics across 20K+ partners
- 40% reduction in manual reporting cycles by deploying automated executive scorecards and real-time KPI dashboards
- 25% improvement in report delivery time through Python-automated data pipelines and ETL optimization
- Built AI-powered Gestalt Intelligence Report system, automating Jira triage analysis that previously took hours of manual work
- Automated weekly reporting workflows using n8n, ensuring consistent stakeholder delivery without manual intervention
- 2-week acceleration in analytics delivery timelines through agile project management and cross-functional alignment
- 30% improvement in team onboarding efficiency through centralized knowledge management and governance frameworks

CERTIFICATIONS

- Tableau Masters Certification
- SQL for Data Science - Coursera (Credential: 8K3FKQA8DQ9Y)
- IBM Digital Badge for Data Analysis with Python
- Data-driven Decision Making - PwC / Coursera
- Agile Project Management - Udemy
- Agile with Atlassian Jira - Coursera

EDUCATION

Bachelor of Technology - Computer Science
Kanpur Institute of Technology, Kanpur, India | 2010 - 2014
